

Development of Construction Project Management System for Decathlon

TalentPace helped Decathlon connecting all the current and future constructions with an integrated construction management tool.

Customer Profile

Decathlon, a network of innovative retail chain and brands providing enjoyment for all sports people.

Innovation at heart, Decathlon activities involve from research to retail, including design, production and logistics with twenty Passion Brands aimed at all sports enthusiasts, from beginners to experts, and are sold exclusively at Decathlon. With 100s of retail stores across the world Decathlon is one of the market leaders in sports merchandising.

Business Scenario

- Like most construction sites, progress and material management processes today are traditional workflows involving tedious paperwork, frequent phone calls/faxes and challenging coordination.
- In this scenario, Decathlon needed a software solution that could seamlessly integrate all functional areas of the construction and streamline operations helping stakeholders and construction project managers with a centralized software to bring efficiency and accountability to the overall processes.
- Automating the complete construction management flow right from land acquisitions until setting up the store in a new location.
- Single user interface has to provide accessibility across multiple departments including Legal, Finance, Field operations, the solution should allow both web and mobile users with separate web interface as well as a native mobile application.
- The Workflow has to help easy to use and provide better visibility in overall progress of the construction and allow various departments to get approvals by eliminating unnecessary manual processes and extended delays.

Solution Delivered

- TalentPace had given an attractive proposition to streamline business processes using a bespoke solution within the customer cost constraints.
- Provided robust, scalable and secured architecture and developed the entire system in a quick turnaround time.
- Successfully countered the challenges with our well established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Integrated with multiple third party technologies and applications and developed reliable solution.
- Designed and delivered sophisticated workflow solution using java and Open Source solution for the web application whilst at the same time developing the mobile/tablet based applications to serve both IOS and Android users.

Business Benefits

- The strategic implementation enabled Decathlon to sustain growth and expansion while driving higher levels of operating performance.
- Helped Decathlon witnessing improved accuracy, reliability and efficiency of operations. Empowered associates to perform self-service functions through paperless processes.
- Our solution helped eliminating Data anomalies with improvement in internal processes and strengthened internal controls
- Waiting time for approvals has been halved with more than 1000 employee queries/requests handled with ease without manual hassles.
- Provided great control and visibility with proper escalation mechanism and time to time notifications of the process.

Technologies

- Java
- MySQL
- Ionic for both Android and IOS.
- HTML5/CSS3
- Web Services

TalentPace did a great job in transforming our complete construction project management processes. They have understood the existing and complex manual processes before designing a fabulous solution which was certainly made every one of us comfortable in use. We are very happy choosing TalentPace as our IT services partner.
