

Mpod for SUTL, Singapore

TalentPace delivered state of the art mobile based delivery management system helped SUTL making it simple for keeping track of the driver and communicate with its fleet any time, virtually from anywhere.

Customer Profile

Headquartered in Singapore, SUTL is one of Asia's foremost conglomerates with a presence across 18 different markets. Since 1968, the privately-held group has grown rapidly, riding on Singapore's expansive years as an entrepot centre.

It gained a reputation as a thriving company with unrivalled expertise in sales and trading. Over the years, leveraging on its entrepreneurial insights and knowledge, SUTL has partnered with some of the best-loved brands in the world and worked with them to navigate through the region's complex and challenging market conditions. From humble beginnings, SUTL has grown itself into an international enterprise covering several industries in Asia.

Business Scenario

- SUTL needed to optimize their fleet and delivery processes by bringing in contemporary technologies and tools as they found lagging behind competitors and decided to enhance its competitive position by reducing operating expenses and improving customer service.
- Enable delivery and distribution management processes with an integrated platform connected with GPS, the company now can improve routing efficiency, speed up delivery times, and improve fleet utilization.
- Purpose of this new system is to bring efficiency in managing day to day operations of delivery and must be made easy & reliable.

Solution Delivered

- TalentPace team assessed the client's operations and architected a comprehensive solution with flexibility, scalability and offered intrinsic capabilities to integrate with third party applications.
- We have successfully countered the challenges with the established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Provided robust, scalable and secured architecture and developed the entire system in a quick turnaround time.
- Keeping in mind all the critical factors and major concern of the client, we have provided cost effective solution in short turnaround time with a well-qualified and very proficient team of technical professionals to develop the complete Fleet Management system.

Business Benefits

- Our solution with GPS capabilities helped making it simple for SUTL to keep track of the driver and communicate with its fleet any time, virtually anywhere.
- Increased deliveries by locating the closest vehicle to a customer.
- Improved efficiency by automating submission of state mileage reports.
