

Unified Budget Platform for a Global Energy Company

TalentPace helped our customer significantly improving operational controls and enhanced accuracy in implement financial strategies.

Customer Profile

Our customer is one of the leading energy companies centrally located in Malaysia providing power generation thru nuclear operations for both public and private sectors operates in 15 countries with seven business groups out of those two are in the nuclear sector and the remaining five are in commercial power generation business.

Business Scenario

- Our customer needed to build a unified system to analyze enterprise's financials in order to enhance financial controls and to assess the further cost synergies accurately.
- The current system is very mess and running with multiple budgeting applications needed to be brought into one single instance enabling the business to manage and execute mission critical business decisions across the enterprise seamlessly.

Solution Delivered

- TalentPace had given an attractive proposition and spearheaded the development of a single budgeting platform for the customer.
- With great domain expertise, TalentPace team begun with designing of the application with an objective standardizing budget and forecasting best practices.
- Provided robust, scalable and secured architecture and developed the entire system in a quick turnaround time.
- Successfully countered the challenges with our well established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Integrated with multiple third party technologies and applications and developed reliable solution.

Business Benefits

- TalentPace helped our customer with unified budgeting solution with simplified process enabling them to manage and implement financial strategies efficiently.
- Significantly improved operating controls and Enhanced accuracy
- Provided ability to counter turnarounds of budgeting results, increased variance and what-if analytics.
