

# Cash and Account Management System for SecuriForce

TalentPace Helped SecuriForce with centralized, rationalized, standardized Cash and Accounting Management system seamlessly integrated with external general ledger systems.

## Customer Profile

SECURIFORCE SDN BHD, Malaysia is principally engaged as a provider of a comprehensive range of services including Cash In Transit, Cash Management, Logistics and Fleets. Established in 1980, SECURIFORCE has also successfully expanded its operations into the more specialized services, such as providing secured overland transportation, vaulting / security storage / warehousing / logistics / freight forwarding (including ground-to-air and air-to-ground services) to meet the needs of exporters and importers.

## Business Scenario

- SecuriForce is needed to develop a real time and event driven workflow solution automating complete back office processes with definable business rules ensuring that the cash and payment transactions are delivered exactly where they need to be.
- The new system has to provide automatic confirmation, settlement messaging and real time payment processing, exception management and accounting seamlessly.

## Solution Delivered

- TalentPace team assessed the client's operations and architected a complete solution with flexible, scalable and offered intrinsic capabilities to integrate third party applications.
- We have successfully countered the challenges with the established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Provided robust, scalable and secured architecture and developed the entire system in a quick turnaround time.
- Keeping in mind all the critical factors and major concern of the client, we have provided cost effective solution in a short turnaround time with a well-qualified and very proficient team of technical professionals to develop the complete Cash and Account Management system.

## Business Benefits

- Enabled efficient and flexible accounts module that manages multiple accounting life cycle processes including back-valuation, account reclassification and etc. Easy to create, customize account charts with interfaces seamlessly linked to the external general ledger systems.
- Real time exception handling allows to spot the errors and action as soon as they occur.
- The complete solution helped decision makers to confidently plan Cash Management and Accounting strategy in the most efficient and effective way.

## Technologies

- ASP.NET MVC
- WebServices
- HTML5/CSS3
- SQL Server
- C#.NET
- Entity Framework
- Rest API
