

Engineering Project Management System for SUTL

“Strategically this solution helped in addressing lot of our operational issues” says the customer for the committed services delivered by TalentPace.

Customer Profile

Headquartered in Singapore, SUTL is one of Asia's foremost conglomerates with a presence across 18 different markets. Since 1968, the privately-held group has grown rapidly, riding on Singapore's expansive years as an entrepot centre. Over the years, leveraging on its entrepreneurial insights and knowledge, SUTL has partnered with some of the best-loved brands in the world and worked with them to navigate through the region's complex and challenging market conditions. From humble beginnings, SUTL has grown itself into an international enterprise covering several industries in Asia.

Business Scenario

- SUTL decided to revamp the existing business application with an Integrated financial, manufacturing, production, inventory and pricing information using a common platform.
- The new system must be an Easy-to-access, real-time visibility for all designated SUTL staff.
- Greater overall production efficiency and cost control, as well as faster, more accurate pricing and quotations.

Solution Delivered

- TalentPace had given an attractive proposition to streamline business processes using a bespoke solution within the customer cost constraints.
- Automated ERP functionality across financial, manufacturing, production, scheduling, estimation and CRM on a single platform.
- Moving from an average costing system to a standard costing system to recover full cost of materials, labor and machine time.
- Successfully countered the challenges with our well established delivery model, methodologies and end to end application development lifecycle as per the CMMI framework.
- Designed and delivered sophisticated workflow solution using java and Open Source solution for the web application whilst at the same time developing the mobile/tablet based applications to serve both IOS and Android users.

Business Benefits

- Easy, real-time access to integrated information delivered great efficiency, more accurate estimates and costings.
- Standard costing functionality gives management better understanding of performance and profit.
- The strategic implementation enabled SUTL to sustain continued growth and expansion while driving higher levels of operating performance.
- Helped SUTL witnessing improved accuracy, reliability and efficiency of operations. Empowered associates to perform self-service functions through paperless processes.
- Provided great control and visibility with proper escalation mechanism and time to time notifications of the process.

Technologies

- Java
- MySQL
- Ionic for both Android and IOS.
- HTML5/CSS3
- Web Services

Their forward thinking and knowledgeable team established TalentPace as an important technology partner for us. TalentPace solution helped us enhancing our services efficiency and provided seamless interactions between heterogeneous application portfolios. We look forward to working with them to improve our online presence.
